## 1 How to Run the app

1. To run this app just use the command "docker-compose -f stack.yml up".
2. Wait, until the data is inserted.
3. After go to the <http://localhost:4001> to use the app.

## 2 How to Use the app

This is the university project. The goal is a simple admin view of any social network.

On the top of the web site you can see the navbar, which contains all function of the app (all categories). **Warning:** Spaces play the role, so please pay attention on the spaces.

### 2.1 Insertion of Social Network

Go to the category "Social Network". To **add** a social network, fill all fields on the bottom, after click add.

### 2.2 Deletion of Social Network

In the category "Social Network" fill the field "URL" and click "Delete".

### 2.3 Insertion of User

In the category "User" fill all the fields on the bottom and click "Add". **The URL** must be existing in the category "Social Network".

### 2.4 Deletion of User

Type the email in the field "email" and click "Delete".

### 2.5 Insertion of Profile

In the category "Profile" fill all the field except ID on the bottom and click "Add". **The email** must be already existing in the category "User".

### 2.6 Deletion of Profile

In the category "Profile" type the ID of the profile and click "Delete".

### 2.7 Insertion of Worker

In the category "Worker" fill all the fields. **The field "URL"** must be existing in the category social network.

## **2.8 Deletion of Worker**

Type Personal Number and click "Delete".

## **2.9 Insertion Of Developer**

Fill the fields on the bottom. Personal Number must be existing in the category worker.

## **2.10 Deletion of Developer**

Type Developer number in the field "Developer number" and click "Delete"

## **2.11 Insertion Of Manager**

Fill the fields on the bottom. Personal Number must be existing in the category worker.

## **2.12 Deletion of Developer**

Type Manager number in the field "Developer number" and click "Delete"
